LINING-OUT STOCK

	Per 100 (EACH)	Per 1000 (EACH)
100 Acer Ossi Beni, 2 yr. grafts, 10-18"	\$ 1.75	\$
ARBORVITAE, see Thuja		
275 Azalea knaphill hybrids, 2 yr. tr.	.40	.35
200 " mucronulatum, strong 1 yr. tr., 5-9"	.20	.17½
100 " Schlippenbachii, strong 2 yr. tr., 3-6"	.35	.30
BEACH PLUM, see Prunus maritima		
BEECH, see Fagus		
500 Chamaecyparis obtusa gracilis nana, 2 yr. grafts	.75	
200 " squarrosa K&C (Blue squarrosa) 2 yr. tr. 8-12"	.40	.35
300 Cotoneaster horizontalis, 2 yr. sdgls.	.17½	.15
* - *		
COTONEASTER PRAECOX		
This is one of the hardiest Cotoneasters and went through 20 degrees below zero without any harm. It has large berries like cranberries which color up in the middle of August and remain on until very late Fall. It grows rather flat and makes an ideal plant to mix in with foundation plantings and especially with ranch-type houses. We can offer for Fall, 1955 and Spring, 1956, the following:		
2,000 3 yr. transplants, 15-18", B.R., (field rows)	.85	.75
* - *		
50 Enkianthus campanulata, strong 2 yr. tr.	.40	
1,800 Euonymus alatus compacta, 2 yr., 4-8", transplanted and cutback last year and full of breaks	.30	.25
* - *		
EXOCHORDA WILSONI		
This plant was introduced into this country by the famous Dr. Wilson. It is a big improvement over Exochorda grandiflora as it blooms much heavier and the flowers are exceedingly fragrant.		
1,000 2 yr. grafts	.75	.60
* - *		

Section 1. Title

Section 2. Purpose

The purpose of this document is to provide a detailed description of the project and its objectives. The project is designed to address the needs of the community and to provide a comprehensive overview of the work that will be undertaken. The objectives of the project are to:

- 1. Identify the needs of the community.
- 2. Develop a plan to address these needs.
- 3. Implement the plan and monitor progress.
- 4. Evaluate the results of the project.

The project will be carried out in a number of stages. The first stage will be to identify the needs of the community. This will involve conducting a survey of the community and holding a series of public consultations. The second stage will be to develop a plan to address these needs. This will involve working with the community to develop a set of priorities and a timeline for the project. The third stage will be to implement the plan and monitor progress. This will involve working with the community to carry out the project and keeping them informed of progress. The fourth stage will be to evaluate the results of the project. This will involve conducting a final survey of the community and holding a series of public consultations to evaluate the project.

The project is expected to have a number of benefits for the community. These include:

- 1. Improved understanding of the needs of the community.
- 2. A plan to address these needs.
- 3. Improved communication between the community and the project.
- 4. A more active role for the community in the project.

<u>Per 100</u> (EACH)	<u>Per 1000</u> (EACH)
--------------------------	---------------------------

VIBURNUM WRIGHTII	
Upright and grows slower than Viburnum dilatatum.	
The leaf is deeply veined and the bright red berries	
color up in August and remain bright red throughout	
the Fall even when the foliage takes on a Fall color.	
The plant is excellent for berry effect. Being a	
slow growing Viburnum makes it a suitable plant for	
use in Ranch-type house plantings.	
175 - 15-18", B&B	1.50
